About us

Hi! Welcome to our website, you are probably wondering who we are and what D2G is. Well, we are a group of international students created in 2022 and our main goal is to share and distribute second hand electronic devices to small startups and those who are in need. Scroll down to learn more about us.

How does it work

Digital to Give is a platform where small businesses can withdraw hardware from our catalog and do you know what the best thing is? Everything is for FREE! But how does it work? Well, thanks to our kind partners like Google, Microsoft, OVH and many more... We collect their outdated hardware so we can give it to smaller companies. Why we also love this project is because it is a sustainable solution for the environment and thanks to D2G the percentage of electronic waste per year is reduced.
